CoPYlot User Manual

1. Starting CoPYlot

1. Download the Application

Download **CoPYlot** (or the DataViewer) from the official website:
CoPYlot project repository

2. Unzip the Executable (if applicable)

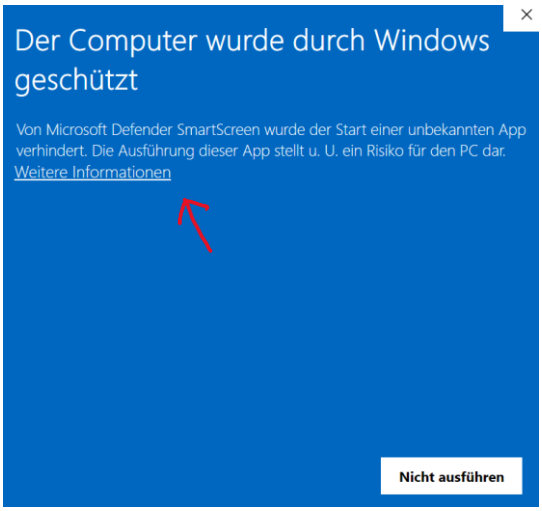

If downloaded file is compressed (e.g. .zip), extract it before proceeding.

3. Launch the Application

Double-click the executable, **or**
Right-click the file and select **Open**.

4. First-Time Security Warning

On first launch, your operating system may display a security warning.
Select the **options indicated within the warning dialog** to proceed and allow the application to run.

5. Accessing the Application Interface

CoPYlot or the DataViewer should automatically open in a new tab in your default web browser.
If it does **not** open automatically, navigate to:
http://localhost:8501/

2. Closing CoPYlot

1. Open the application's **sidebar**.
2. Click the **Quit App** button.
3. The program will freeze after clicking **Quit App**. You may now safely close the browser tab.
